A. Clinic Report

1. Executive Summary

Kasese Health Center is located in the central region, Dowa district, Traditional Authority Chakhaza, along M1 road (Kasungu – Lilongwe) in Malawi, Africa. The Health Center is under the sponsorship of Orant Charities a non-governmental organization based in the USA.

For May 2024, Kasese Health Center (KHC) saw **4183** clients at (OPD). Only **94** patients were seen during weekends and nights. The total number of patients seen in May is **4277**(KHC OPD). MOC in Kasese catchments areas saw **1818** (MOC1: 701 and MOC2:**1117**). Kasungu (Bowe) Outreach clinic saw **4766** clients (MOC1: 3514 and MOC2: 1252). MOC's total number of patients seen is **6584**. The total number of patients seen in May 2024 is **10861** (Dowa: **6095 (56.1%)** & Kasungu **4766 (43.9%)**).

The Laboratory department tested **7342** for Malaria, out of which **4981** were positive, representing a **67.8%** positivity rate. In Dowa, **4267** patients were tested and **2646 (62.0%)** were positive cases; in Kasungu, **3075** patients were tested and **2335(75.9%)** were positive.

The Maternity department admitted **41** mothers and referred **16**. A total of **36** babies were born at the facility and **5** in transit (BBA). Out of **41** babies, **10** had complications (**7** Weight < 2.5 Kgs, and **3** Prematurity). The total Maternity attendance was **57** (**41** admissions and **16** referrals).

The HTS department tested **289** clients, **4** were found positive.

The total number of patients seen at the eye clinic by an outsourced clinician is **54** and **5** were booked for surgery.

Cervical Cancer providers screened a total of **57** women in Dowa, **1** VIA+ and **22** women in Kasungu, **no** VIA+. Total women screened was **79** and **1** were VIA+(**1.3%**).

The MOC 1 team and MOC 2 managed to conduct all scheduled visits in the month.

2. Introduction

The Health Center in its provision of services provides curative and preventive health care services to impoverished rural communities of Dowa district (Chakhaza) and Kasungu district (Bowe) through a static clinic and Mobile Outreach Clinics (MOC). At the static clinic, the Health Center operates a busy Outpatients Department (OPD), a 7-bed capacity maternity ward, twice a weekly Antenatal Program, a weekly Cervical Cancer Screening clinic, a monthly Eye Clinic, an Under-Five Clinic (immunization and child growth monitoring) just to mention but a few. MOC takes the services in hard-to-reach areas thereby providing accessible treatment.

Tropical infectious diseases are a common health problem including malaria, and respiratory diseases like pneumonia, bronchitis etc. However, non-communicable diseases are on the rise for example diabetes, and hypertension.

Table 1 below shows monthly patients seen in both Dowa and Kasungu.

C. Achievements and Challenges

1. Success Highlights

- The slight decrease in OPD attendance because of availability of drug in public hospitals and the month of May is towards the end of malaria epidemic season.
- There is an increase in cervical cancers screening attendance as compare to previous months.
- Depo-provera and condoms remain the main preferred family planning methods.

2. Challenges

- Under-weight and prematurity remain the main problem in newborn complications.
- There is slight decrease in maternal attendance in comparison to last months.
- Malaria remain the main non communicable disease followed by respiratory infections.
- Young prim-gravida remain the main referral for maternal

D. Way forward

- i. There is a need to do thoroughly research to establish why there is an increase in adolescent pregnancy.
